

Haywood County Region A Opioid Abatement Needs Assessment

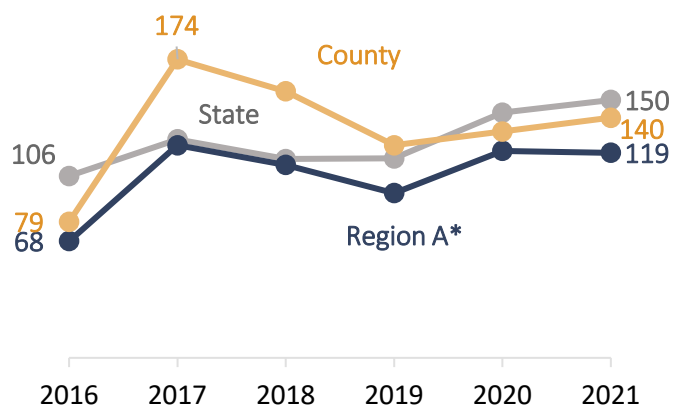

Haywood County is a rural community with a total population of 61,862 in 2020.¹ Between 2017-2021, the **median household income** in the county was roughly \$8,000 less than the state's median (\$52,063 vs \$60,516). In 2020, the **median age** in the county was greater than in the state (48 years vs 39 years). This page highlights indicators specific to opioids and opioid use disorder (OUD).

Overdose ED Visits

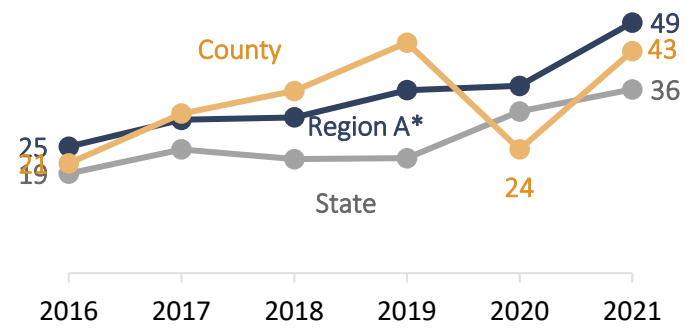

Rate of emergency department visits with a drug overdose diagnosis, per 100,000 residents (Crude)²

Overdose Deaths

Rate of unintentional overdose deaths due to any drug, per 100,000 residents (Crude)²

Across the US in 2021, 75% of overdose deaths involved opioids.³

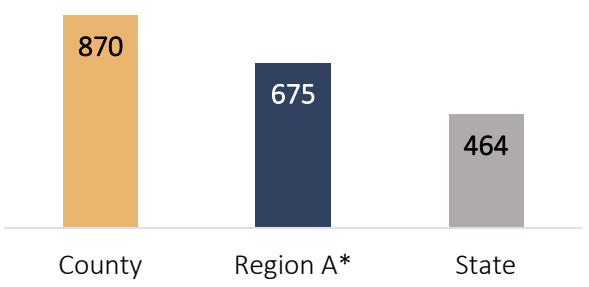

Historically, the rate of overdose ED visits has trended higher in Haywood County than in Region A* overall. The rate of unintentional OD deaths has shifted trends and since 2020 the county's rate has remained lower than the regional rate.

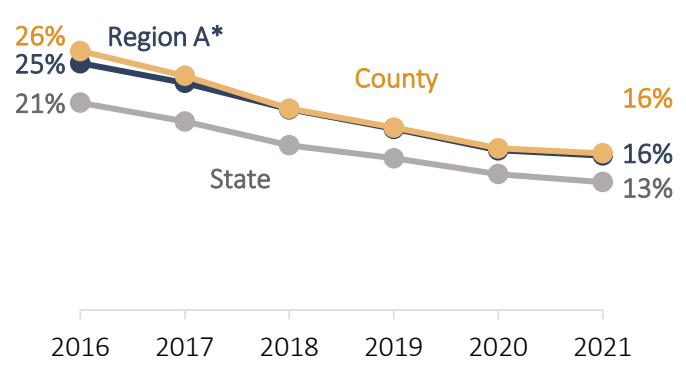

Access to OUD Care

Rate of individuals[†] served by treatment programs for Opioid Use Disorder, per 100,000 residents (Crude, 2021)²

Opioid Prescriptions

Percentage of residents receiving dispensed opioid pills²

In 2021, the rate of individuals served by treatment programs for OUD was greater in Haywood County than in the region and state. Between 2016-2021, Haywood County had a nearly identical percentage of residents receiving opioid pills as the region.

* Region A figures are estimates extrapolated from county-level counts, rates, and/or percentages.

† Among Medicaid beneficiaries and those who are uninsured.

Haywood County Region A Opioid Abatement Needs Assessment

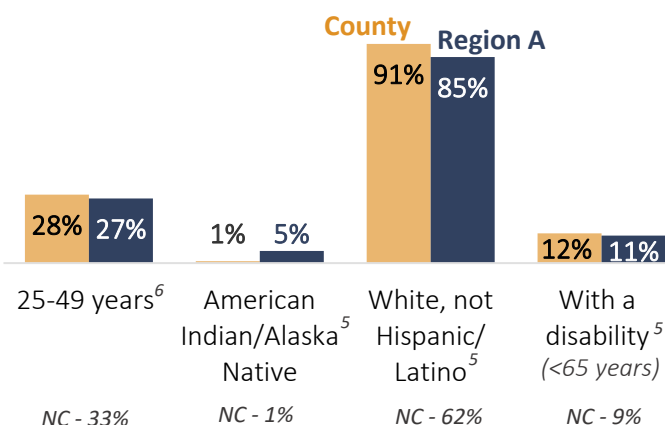

i This page highlights sociodemographic and socioeconomic characteristics associated with higher risk of unfavorable opioid-related outcomes, as well as indicators related to mental health.

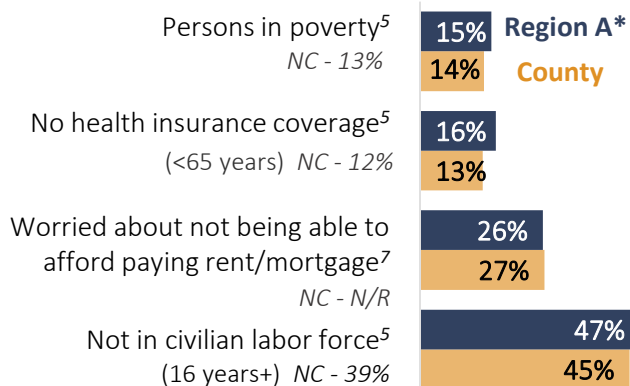

Sociodemographic Risk Factors

47% of Haywood County residents live in a **rural area** (77% in Region A, 34% in NC).⁴

1 in 2 Haywood County residents are **male** (same in Region A and NC).⁵

Socioeconomic Risk Factors

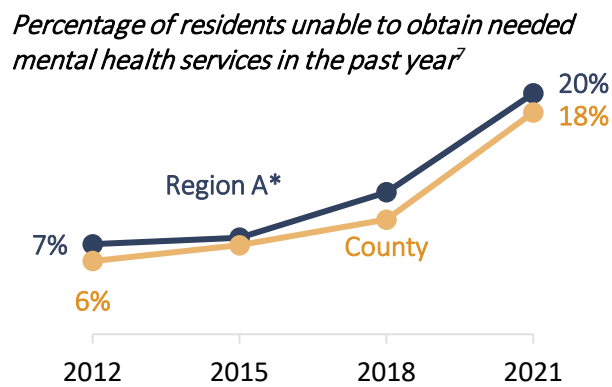

There are **43.3 senior adults per 100 working-age people** in Haywood County (46 per 100 in Region A*; 26 per 100 in NC).⁶

The large older population is a **driver of lower labor force participation** and likely **increases household financial stress**. It may also **increase the supply of prescription opioid pills** in the county due to the higher prevalence of chronic pain issues among older adults.

Mental Health

76% of Haywood County residents **always** or **usually** received needed social/emotional support (72% in Region A*, N/R for NC).⁷

23% of Haywood County residents reported **8+ days of poor mental health in past month** (23% in Region A*, N/R for NC).⁷

While most Haywood County residents typically **received needed social/emotional support**, about 2 in 10 residents did not, and 1 in 4 experienced a high number of poor mental health days. In addition, the percentage of county residents who **were unable to obtain needed mental health services** in the past year has been rising similarly to regional levels. **This highlights the need for an increase in various types of support.**

* Region A figures are estimates extrapolated from county population data and county rates/percentages.
